

EEK, mice, please advise, cont.

Dear Best Pest:

I live on the fifth floor of a brick building near Harvard Square—and have mice. The building management has given me traps—but these being Cambridge mice, they appear to be outsmarting us.

Last night, a big one ran across my living room; last week, a small one scurried halfway across the kitchen. When I jumped, he scurried back under the dishwasher. Three have succumbed to sticky traps, which has been horrible.

Can you please advise me on what it might cost to seal off a 750 Sq. foot apartment with a living room, bedroom, kitchen, hallway and bathroom? Thanks—Anita Harris 617-576-0906
