

Nine-Day Cambridge Science Festival Showcases City's Tech Prowess

The [Cambridge Innovation Center](#) and quite a few companies will be holding open houses this Thursday in Kendall Square, Cambridge—as part of the nine-day [Cambridge Science Festival](#).

Billed on its Web site as “the first of its kind in the nation,” the annual Festival opened on Saturday, April 24, to showcase Cambridge as *an internationally recognized leader in science, technology, engineering and math. A multifaceted, multicultural event held every spring, the Cambridge Science Festival makes science accessible, interactive and fun.*

A myriad of events—ranging from talks and panel discussions to demonstrations, luncheons, museum exhibits, elementary school science fairs and company open houses—are listed at the [Festival's Schedule of Events](#).

I expect to be at the [Cambridge Innovation Center](#) open house at 1 Broadway on Thursday evening—as will my client, [InVivo Therapeutics](#), and [Vitality](#), [Seeding Labs](#), [Acorn Product Development](#), [HubSpot](#) and other companies. [The Venture Cafe](#), on the 11th floor, will be open to the public from 6-9 pm.

Also on Thursday evening, [Microsoft's NERD Center](#), [Google](#), [VMware](#), and the [Singapore-MIT GAMBIT Game Lab](#) will hold open houses.

The Festival is sponsored by MIT, Pfizer, and the city of Cambridge.
